

(Press Release) January 19, 2010 - Stuart, FL Vapour Inc. (www.vapourinc.com) is donating a WATER GENIE 1000 atmospheric water generator to Haiti through the Naples based 'Hope for Haiti' non-profit organization. The unit will produce over 250 gallons of pure drinking water from the air per day for earthquake survivors. One of the most critical needs in these early days after the earthquake is clean drinking water. The lack of water could further weaken those who are injured, and the contamination of drinking water supplies could threaten survivors and rescue personnel.

The donation of the WATER GENIE 1000 gives Haiti a unique and effective way of dealing with the water crisis. To achieve this, the atmospheric water generator produces 1000 liters of water from the air everyday. The ambient air passes through an ultra filtration air filter and then it is condensed using the same principle as your air conditioner or dehumidifier to extract the water from air. It then passes through a 4 stage filtration system taking out any and all other contaminants. This is more effective than any type of water filtrations system, especially in the hardest hit areas where there is no water to filter.

"From all of us here at Vapour we would like to send out our deepest sympathies to Haiti." Brad Collier the CEO/ President of Vapour Inc. goes on to say "We are very pleased to be able to contribute equipment that can make pure, sustainable water from the air. The shortage of clean water is emerging as the new focus of this unfolding disaster."

Vapour Inc. has teamed up with the non-profit organization Hope for Haiti. They are providing the logistics to transport the WATER GENIE 1000 from the port of Miami to their relief center in Port-au-Prince. It is the goal of both organizations to have this be just the first of many WATER GENIE 1000 units that are sent through donations to help provide purified drinking water to the thousands of people in need.

About Vapour Inc: **Vapour Inc.** was established on June 6, 2009 in Florida. The purpose of the Company is to bring atmospheric water generators to market in the U.S. and the UK. With a full line of atmospheric water generators ranging from a 3.5 liters per day capacity home/office unit (Mimi Water Genie) to units producing 1000 liters per day (Water Genie 1000).

About Hope for Haiti: **Hope for Haiti** is a 501(c)(3) non-profit charitable organization whose mission is to improve the quality of life for the Haitian people, particularly children, through education, nutrition, and healthcare.
