

Kay Germaine Special Needs Center

Kay Germaine was created to be a facility specifically designed to help care for children and adults who suffer with certain handicaps. The building is fully equipped for physical therapy including individual therapy rooms and a therapy pool. The building also acts as a school for approximately 80 handicapped children with trained teachers providing quality education to children with special needs. The facility is located in Tabarre and is run by Nuestros Pequeños Hermanos (NPH) "Our Little Brothers and Sisters." Hope for Haiti committed \$200,000 to the construction of this important, life changing special project.
