

Hope for Haiti[®]

Over 20 years of service and partnership

EARTHQUAKE RECOVERY: ONE-YEAR LATER

Sa ki fè pwomès bliye, sa k'ap espere sonje.

Those who make promises forget, those who are hoping remember.

On January 12, 2011...

We remember the lives that were lost,

We remember the hearts that were broken,

We remember the homes that were destroyed,

We remember the 1.3 million families who are still homeless,

We remember and we will never forget.

What has Hope for Haiti done since January 12th?

We made a promise to long-term relief and recovery in partnership with the Haitian people. So far, we have:

- ★ Safely distributed over **\$30 million** worth of emergency aid to **over 100 sites**;
- ★ Established an emergency Haitian staffed clinic that **served 10,000 displaced residents**;
- ★ Sent **specialized medical volunteers** to care for earthquake survivors;
- ★ **Repaired and renovated two schools** in time for the beginning of the 2010-2011 school year;
- ★ **Restored a local bakery**, providing bread to the Port-au-Prince community;
- ★ **Built temporary structures** at both a destroyed school and a Nutrition clinic;
- ★ Supported **40 schools, 10,000 students, and 400 teachers**;
- ★ Trained **24 Community Health Workers** to educate over **2,100 students** and their communities;
- ★ Responded to Hurricane Tomas with emergency relief to **benefit approximately 1,500 people**;
- ★ Distributed **medications and public health outreach** in response to the Cholera epidemic;
- ★ Forged **partnerships** with many private and public organizations working on the ground;
- ★ Shared **logistical support and local knowledge** to leverage *Hope for Haiti's* relief capacity.

What are Hope for Haiti's goals for continued recovery and development?

1. To **increase** access to medical care and expand public health outreach
2. To **strengthen** and build capacity within our education program
3. To **construct** and repair affected program buildings (schools, clinics, and homes)
4. To **expand** clinical services offered at the *Hope for Haiti* Infirmary in Les Cayes
5. To **enhance** and expand inter-organizational partnerships and coordination

We need your help to continue giving **HOPE** and **LIFE** to the Haitian people.

Lespwa Fè Viv. | Hope gives life.
